Q: Making sure that all value entered into a select box is used I would like to see that before a select box with a bunch of options is shown, that there is atleast one of the options filled into it. Is there a method to to this? I've tried something like the JS shown below, but I don't find that input type="select" option to be working. $("input[name=object]").change(function() { var hasSelection = false; $("select option").each(function(idx, option) { if ($(option).is(":selected")) hasSelection = true; }); if (hasSelection) { alert("check to see if there's been entered form of some kind.."); $("#object").hide("slow"); } else { alert("Is this always required to be checked.."); });
